with "Edu-Kit"**

#### THE "EDU-KIT" — A REVELATION

Ever since the days of the great Marconi, Fleming and De Forest, intelligent men the world over have sought the wonderful secrets of the science of radio.

In its very beginning, the mysteries of radio communication were only known to recognized scientists and highly skilled technicians of the field. Later, when a person wished to learn radio, it was necessary to attend a specialist school, often located in a distant city. The lengthy course of study generally offered at the schools required years to complete and cost the student hundreds of dollars.

Today, this is no longer true. All of these before-mentioned impediments to radio knowledge have been removed by a new, modern approach to the problem — the Progressive Radio "Edu-Kit." This unique and successful plan was developed after several years of testing and analysis by Radio-TV Instructors and Engineers. Their objective was to provide the un-informed with a broad, basic foundation in radio theory and construction practice. They have accomplished their task in an amazingly fine fashion.

Now — one may quickly start learning radio by merely utilizing spare time — in the comfort and convenience of his home and, what is more important, at a money-saving low cost. Isn't this a logical, common-sense study method? Isn't this the ideal way to open the door to the interesting, exciting field of Radio, HiFi and TV?

Here, indeed, is your key to radio knowledge!

# Progressive "Edu-Kit"® HOME RADIO COURSE

**BUILD 20 RADIO & ELECTRONIC CIRCUITS**

**ALL GUARANTEED TO WORK !**

**Complete with all Parts and Instructions**

#### WHAT THE "EDU-KIT" OFFERS YOU

The "Edu-Kit" offers you an outstanding PRACTICAL HOME RADIO COURSE at a rock-bottom price. Our Kit is designed to train Radio & Electronics Technicians, making use of the most modern methods of home training. You will learn radio theory, construction practices and servicing.

You will learn how to build radios, using regular schematics; how to wire and solder in a professional manner; how to service and trouble-shoot radios. You will work with the standard type of punched metal chassis, as well as the latest development of Printed Circuit chassis.

You will learn the basic principles of radio. You will construct, study and work with RF and AF amplifiers and oscillators, detectors, rectifiers, test equipment. You will learn and practice code, using the Progressive Code Oscillator. You will learn and practice trouble-shooting, using the Progressive Signal Tracer, the Progressive Signal Injector, the Progressive Dynamic Radio & Electronics Tester, the Square Wave Generator and the accompanying instructional material. You will build 20 Receiver, Transmitter, Code Oscillator, Signal Tracer Amplifier, Square Wave Generator and Signal Injector circuits, and learn how to operate them. You will receive an excellent background for Television and High Fidelity.

Absolutely no previous knowledge of radio or science is required. The "Edu-Kit" is the product of many years of teaching and engineering experience. The "Edu-Kit" will provide you with a basic education in Electronics and Radio. The Signal Tracer alone is worth more than the price of the entire Kit.

#### THE KIT FOR EVERYONE

You do not need the slightest background in radio or science. Whether you are interested in Radio & Electronics because you want an interesting hobby, a well paying business or a job with a future, you will find the "Edu-Kit" a worth-while investment.

Here is an excerpt from a letter that we received from Loren DePriest, 1496 4th St., Mansfield, Ohio: "I have spent many pleasant hours in constructing the radios from the schematics in your book, and have learned a great deal from them. Being as I am interested in Radio, I consider the money spent for your course as a wise investment. I have learned more from your course by actually doing than I did from an expensive course."

Many thousands of individuals of all ages and backgrounds have successfully used the "Edu-Kit" in more than 79 countries of the world. The "Edu-Kit" has been carefully designed, step by step, so that you cannot make a mistake. The "Edu-Kit" allows you to teach yourself at your own rate. No instructor is necessary.

The "Edu-Kit" is also used for courses of study, extra-curricular activities, industrial personnel training and rehabilitation. The "Edu-Kit" is used by Jr. High Schools, High Schools, Technical Schools, Jr. Colleges, Colleges, Universities, Industrial firms, Rehabilitation Hospitals, Boards of Education, U. S. Govt. agencies, United Nations Educational, Scientific and Cultural Organizations (UNESCO), Veterans Administration, and numerous adult, radio and young people's groups and clubs. The "Edu-Kit" is also popular with servicemen throughout this country and abroad.

Designed for universal use, the "Edu-Kit" operates on any voltage from 105 to 125 volts, AC and DC. For use in certain foreign countries employing higher line voltages, a step-down adaptor is available upon request.

**NOW! TRAIN AT HOME IN RADIO AND ELECTRONICS**

## THE "EDU-KIT" IS COMPLETE

You will receive all parts and instructions necessary to build 20 different radio and electronics circuits, each guaranteed to operate. Our kits contain tubes, tube sockets, variable, electrolytic and paper dielectric condensers, resistors, tie strips, coils, hardware, tubing, punched metal chassis, Instruction Manuals, volume controls, selenium rectifiers, switches, etc.

In addition, you receive Printed Circuit materials, including Printed Circuit chassis, special tube sockets, hardware and instructions. You also receive a useful set of tools, a professional electric soldering iron, and a self-powered Dynamic Radio & Electronics Tester. The "Edu-Kit" also includes Code Instructions and the Progressive Code Oscillator.

You will also receive lessons for servicing with the Progressive Signal Tracer, the Square Wave Generator and the Progressive Signal Injector, TV, Radio and High Fidelity Guides and a Quiz Book. You receive all parts, tools, instructions, etc. Everything is yours to keep.

## LEARN BY DOING

The Progressive Radio "Edu-Kit" is the foremost educational radio kit in the world, and is universally accepted as the standard in the field of electronics training. The "Edu-Kit" uses the modern educational principle of "Learn by Doing." Therefore you construct, learn schematics, study theory, practice trouble-shooting—all in a closely integrated program designed to provide an easily-learned, thorough and interesting background in radio.

You begin by examining the various radio parts of the "Edu-Kit." You then learn the function, theory and wiring of these parts. Then you build a simple radio. With this first set you will enjoy listening to regular broadcast stations, learn theory, practice testing and trouble-shooting. Then you build a more advanced radio, learn more advanced theory and techniques. Gradually, in a progressive manner, and at your own rate, you will find yourself constructing advanced multi-tube radio circuits, and doing work like a professional Radio Technician.

## TROUBLE-SHOOTING

You will learn trouble-shooting and servicing in a progressive manner. You will practice repairs on the sets that you

construct. You will learn symptoms and causes of troubles in home, portable and car radios. You will learn to use the professional Signal Tracer, the unique Signal Injector and the dynamic Radio & Electronics Tester. While you are learning in this practical way, you will be able to do many a repair job for your friends and neighbors, and charge fees which will far exceed the price of the "Edu-Kit." Our Consultation Service will help you with any technical problems you may have.

J. Stataitis, of 25 Poplar Pl., Waterbury, Conn., writes: "I have repaired several sets for my friends and made money. The "Edu-Kit" paid for itself. I was ready to spend \$240 for a Course, but I found your ad and sent for your Kit."

## PRINTED CIRCUITRY

Our Engineering and Educational Staffs are constantly working on new projects and new circuits to keep up-to-date with modern developments in Electronics.

Of course, you know that Printed Circuits are the latest advancement in Electronics. Applications and use range from tiny hearing aids to complex computers and business machines, in addition to Radio and TV Sets.

A Printed Circuit is a special insulated board (made of some laminated plastic as phenolic, epoxy, melamine, etc.), on which has been deposited, by a special process, a conducting material (such as copper, silver, etc.). This conducting material takes the place of the various filament, B plus, power supply, and tube connections.

All that remains to be done is to plug in special tube sockets, insert the component leads (condensers, resistors, etc.) in the proper holes provided in the printed circuit board, and solder the leads in place. **YOU CANNOT MAKE A MISTAKE IN WIRING.**

The Signal Injector, constructed by means of Printed Circuitry, is a unique servicing instrument that can detect many defects in Radio and TV sets.

## THE PROGRESSIVE SIGNAL TRACER

The Signal Tracer is one of the most useful instruments that a serviceman can own. It is as valuable to the serviceman as the stethoscope is to a Physi-

cian. One of the sets that you will build with the Progressive Radio "Edu-Kit" is a high gain Signal Tracer.

If you were to purchase a Signal Tracer, the price alone would be higher than the price of the entire Progressive Radio "Edu-Kit." Yet, here is a piece of equipment that is just one of the 20 different circuits that you will build with the "Edu-Kit."

The Signal Tracer makes it possible for you to service all types of radios. But that isn't all. After you have read the clear instructions, you will be eager to seize the opportunity to examine and repair radios of friends and neighbors. You may earn fees that will quickly pay the small cost of your Progressive Radio "Edu-Kit," and start you in business.

## Free Extras

Economies of mass production and tremendous sales allow us to pass on savings to you in the form of FREE GIFTS.

- **SET OF TOOLS**  
(Multiple Tool Set—very useful for Radio & TV)
- **DYNAMIC RADIO & ELECTRONICS TESTER**  
(Self-Powered Instrument tests Voltages, Frequency and Resistances—A tremendous aid in trouble-shooting)
- **TESTER INSTRUCTION MANUAL**  
(Detailed description and use of the Dynamic Radio and Electronics Tester)
- **ELECTRIC SOLDERING IRON**  
(A Professional model especially designed for Radio and Electronics Work)
- **GUIDE TO HIGH FIDELITY**  
(Excellent digest and introduction to the field of High Fidelity)
- **MEMBERSHIP IN RADIO-TV CLUB: CONSULTATION SERVICE**  
(Entitles you to permanent use of our famous Consultation Service)
- **RADIO TROUBLE-SHOOTING BOOK**  
(Radio servicing simplified: Home, Auto and Portable Sets)
- **QUIZ BOOK**  
(Expertly designed to test your Progress—an Ideal aid in your Training)
- **TELEVISION BOOK**  
(Theory and trouble-shooting clearly explained)
- **FCC AMATEUR LICENSE TRAINING**
- **PLIERS & CUTTERS**  
(A valuable combination for all Electronics Work)
- **CERTIFICATE OF MERIT**  
(Attractive and Suitable for Framing)
- **DISCOUNT CARD**  
(Provides important savings on many electronic products)

## You Will Find That The Progressive Radio "Edu-Kit" Is Perfect

- ... FOR anyone who wishes to learn more about radio construction, theory and servicing.
- ... FOR anyone who is looking for an interesting hobby.
- ... FOR anyone who would like to learn radio but does not have time to attend regular school hours.
- ... FOR anyone who wants to start studying for a high-paying radio job.
- ... FOR anyone who wishes to start in Television.

# Here are the answers to some of the most commonly asked questions

**Question:**

*Do these sets operate on the regular Broadcast Band?*

**Answer:**

Yes, the sets operate on the regular Broadcast Band.

**Question:**

*I am very busy with my schoolwork! Will I have enough time to build the different circuits?*

**Answer:**

Yes, you will have time to build the different circuits. Unlike expensive courses, which you must complete within specified periods of time, you can work on the "Edu-Kit" in your spare time. You can put in as little or as much time as you like.

**Question:**

*Is my purchase price the complete price, or do I have to send additional money later on?*

**Answer:**

Your purchase price is the complete price. You don't have to send a single penny later on.

**Question:**

*I am 14 years of age. Am I too young to build the "Edu-Kit?"*

**Answer:**

You are not too young. The Progressive Radio "Edu-Kit" has been used successfully by youngsters of 12, with no help from adults.

**Question:**

*I live in Thailand (Siam); the nearest station is almost 100 miles away. Will I have trouble with my "Edu-Kit?"*

**Answer:**

You will have no trouble getting your sets to operate. The "Edu-Kit" is sold in 79 countries throughout the world.

**Question:**

*Are all the parts to build the 20 different circuits sent at one time, or are they sent separately?*

**Answer:**

All the parts are sent to you in one shipment, so that you can start to work immediately!

**Question:**

*Will I be able to get all of these circuits working?*

**Answer:**

Yes, these circuits are Guaranteed to work. Our Consultation Service is always ready to help you with the slightest problem.

**Question:**

*I have decided to take a radio course with a certain Correspondence School. Will your "Edu-Kit" help me?*

**Answer:**

Many Radio Schools recommend the Progressive Radio "Edu-Kit" as an ideal supplement to their Course. We constantly receive letters telling us that the "Edu-Kit" has proved even more instructive and useful than expensive radio courses costing several hundreds of dollars.

**Question:**

*What kind of parts does your "Edu-Kit" use?*

**Answer:**

The "Edu-Kit" uses brand-new, Standard High Quality parts and components. Every part carries an unconditional guarantee.

**Question:**

*Do I have to return any papers or Quizzes to you?*

**Answer:**

No, you do not have to return any record of your advancement to us. You progress at your own speed.

**Question:**

*Will you help me with technical problems other than those related to the "Edu-Kit?"*

**Answer:**

Yes, our Consultation Service is ready to answer any of your problems.

**Question:**

*I am in business for myself as a radio repairman. Will your "Edu-Kit" give me some additional experience and training?*

**Answer:**

Yes, the "Edu-Kit" is an ideal Kit for improving your knowledge of practical radio and servicing.

**Question:**

*Are each of the 20 circuits that I build complete sets?*

**Answer:**

Yes! Even the very first set that you build is a complete radio, and will receive stations. Each of the succeeding circuits is also complete.

**Question:**

*Do I have to return any of the parts that I receive?*

**Answer:**

No, you keep every part and Free Extra that we send you. The entire "Edu-Kit" belongs to you.

**Question:**

*I do not have an elementary school education! Will I be able to build the different circuits, and understand the theory?*

**Answer:**

Yes, you will be able to build all the sets, and understand all the theory, even though you are lacking a formal education. No previous knowledge of Science or arithmetic is required. The Progressive Radio "Edu-Kit" is a practical training Kit, and you will have no trouble building the different circuits.

**Question:**

*I wish to purchase the "Edu-Kit" as a gift for my nephew in Australia. Does it make a suitable gift?*

**Answer:**

Yes. The "Edu-Kit" is attractively packaged, and makes a beautiful gift for every occasion. We will ship it anywhere in the world! We shall be glad to enclose a Gift Card for you.

**Question:**

*Do I need a License to operate the Transmitter that I build with the "Edu-Kit?"*

**Answer:**

No, you do not need a license to operate the Transmitter. Our Staff has designed it so that it operates within the range allowed by the FCC for transmitting without a license.

# Comments from Organizational and Other Users of the "EDU-KIT"

**OKLAHOMA INSTITUTE OF TECHNOLOGY,  
STILLWATER, OKLA.**

"Some of our students have made use of Progressive "Edu-Kits," and we think they are quite valuable."

**VETERANS ADMINISTRATION HOSPITAL,  
LIVERMORE, CALIF.**

"Manual Arts Therapy has several "Edu-Kits" in use here at this hospital. It is a very successful and popular type of therapy."

**BILL LEONARD, CBS RADIO & TV COMMENTATOR,  
NEW YORK, N. Y.**

"I certainly did receive one of your Progressive Radio "Edu-Kits," and I'm happy to report that my ten-year-old boy, with very little supervision, built a complete three-tube receiver—one that works—in less than three hours. He's mighty proud and you should be too. Your instructions are clear, and the electronic material wholly adequate for educational purposes, and I'm speaking as a radio ham operator of twenty years standing."

**CLARK SMITH, 913 WILBANKS AVENUE,  
E. GARSDEN, ALA.**

"This is to let you know how much I am enjoying your Kit. It is the only Kit that I have seen that is so complete. I believe the Kit is worth much more than you charge for it. It is very easy to understand. It has helped me to understand my Navy Reserve Training better."

**ENSLEY HIGH SCHOOL, BIRMINGHAM, ALA.**

"We are very well pleased with the kit and expect to order more in the near future."

**DOROTHY M. WALKER, 2455 N. W. QUIMBY ST.,  
PORTLAND OREG.**

"I have enjoyed reading and studying the "Edu-Kit" Instruction Book, and have just completed Set No. 4 with excellent results."

"I believe you greatly underestimate the value of the knowledge that the Kit offers. I received a promotion to Inspector in the Electronics Department of the firm where I am employed. This happened just one week after I received the "Edu-Kit." In that time I had completed Sets Nos. 1 and 2. My employer was quite interested in my new-found knowledge."

**MRS. MURRAY DUNN, 704 HAMMOND STREET,  
FT. WORTH, TEX.**

"I want to say thank you for offering such an interesting low-priced radio course. I have thoroughly enjoyed each and every lesson. I have become so interested in radio that I will continue my study of it, and I hope to become very efficient. I have always been interested in radio, but never had the money to spare to pay for a high-priced course."

"By the way, I happen to be a forty year old woman. I started this course as a hobby, but it will probably end up more than a hobby."

"Thanks again for offering such an interesting and instructive radio course."

## BECOME A RADIO TECHNICIAN AT HOME

*The New "Edu-Kit"®  
is Now Ready*

### INCLUDES

- ★ 12 Receivers
- ★ 3 Transmitters
- ★ Signal Tracer
- ★ Amplifier
- ★ Signal Injector
- ★ Code Oscillator
- ★ Square Wave Generator

**Build  
All These —  
OR YOUR  
MONEY BACK!**

The Progressive Radio "Edu-Kit" is manufactured and sold exclusively by Progressive "Edu-Kits" Inc.

It is not available from any store, shop or distributor. It is available only through the mails from us.

As a result of our direct contact with our customers, we eliminate costly middle-man's profit and pass the savings on to you. That is why we can sell our World-Famous Kit for such a low price.

Remember that when you buy through the U. S. Mail, you are buying merchandise that is Guaranteed 100%.

# PROGRESSIVE "EDU-KITS" INC.

CREATORS OF THE PROGRESSIVE RADIO "EDU-KIT"®

1186 BROADWAY, HEWLETT, N. Y.

::

FRANKLIN 4-2016

Dear Friend:

I have an important message for you. Now you can get an education in radio-electronics so inexpensively and so easily that I believe you will welcome the opportunity which I am going to offer you.

For years a good education in radio and electronics was available only to those who could afford hundreds of dollars and the time necessary to take a lengthy course of study. With the increasing importance of electronics in our lives, it was inevitable that a new approach to the study of this subject would be devised. After years of testing and analysis by Radio-TV Instructors and Engineers, a unique course was developed which provides the beginner with a broad, basic foundation in radio and electronics theory, construction practice and repairs. Most remarkable is the fact that this course can be studied in your own home, at your leisure, and at an unbelievably low price.

This is surely the time to order your "Edu-Kit" Radio Course. We have just finished making improvements in the course, adding features and supplementing our services. You will receive all radio parts, tubes, chassis, tools, even solder and wire. There is nothing else for you to buy. You receive complete instruction material, including the subjects of Radio, Television, High Fidelity, Amateur Radio. You will receive a Certificate of Merit and Membership in the Progressive Radio-TV Club. You will be entitled to discount privileges towards the various electronic products, kits and books which we sell. And, of course, you will be entitled to our world-famous Consultation Service, which provides free life-time advice and information in electronics.

Naturally, it is understood that you must be satisfied with the "Edu-Kit" Radio Course, or your money will be refunded. There are no conditions attached to this Money-Back Guarantee. I sincerely hope you will order your course soon - today, if possible. Use our convenient reply envelope.

Sincerely yours,

A handwritten signature in cursive script that reads "S. Goodman".
